SECOND RENEWED PETITION UNDER 37 C.F.R. 1.47(a)

Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Dear Sir:

This paper is in response to the Decision on Petition (undated) received by Applicant on July 17, 2006.

In the Decision on Petition, the Office states that:

The Declaration of Phillip Pluck states that Mr. Finn refused to execute the inventor's declaration in a conversation dated 09 June 2006. However, it is unclear from the present Petition and accompanying documents whether John Barry Finn has been presented with a complete copy of the application papers (specification, claims, drawings, and oath/declaration) as required. Lastly, the declarations of Brian Douglas Jenkins and Phillip Pluck failed to provide the circumstances of the presentation of the application papers to John Barry Finn.

In response, Applicants submit the Declaration of Barry Meskin dated 21 August 2006. Mr. Meskin is the Australian attorney representing the owner of the application, H2O Holdings. In the Declaration, Mr. Meskin states that he couriered to Mr. John Barry Finn a package including the U.S. application and the corresponding priority PCT

application (including the specification, drawings, and claims for each application), along with the inventor's declaration and a cover letter. Mr. Meskin includes documentation including the letter sent by Mr. Meskin to Mr. Finn asking that he execute the inventor's declaration, as well as documents from the courier service, TNT, showing successful delivery of the package to Mr. Finn.

Mr. Meskin provides additional documentation regarding telephone calls and a follow-up letter which he sent to Mr. Finn asking Mr. Finn to return the Declaration, but that Mr. Finn never responded to any of Mr. Meskin's communications.

Applicants respectfully submit that the Declaration of Barry Meskin provides the proof required by MPEP §409.03(d) that a bona fide attempt was made to present a copy of the application papers to the non-signing inventor, but the inventor refused to sign the Declaration.

Additionally, Applicants submit a copy of the Declaration of Brian Douglas Jenkins dated 30 June 2006, which Applicants previously submitted. Mr. Jenkins is a co-inventor of the present application. Mr. Jenkins' Declaration evidences Mr. Jenkins' prior attempts to persuade Mr. Finn to sign the inventor's declaration, but that on two occasions Mr. Finn explicitly refused to sign the inventor's declaration.

CONCLUSIONS

Applicants submit that by this submission, the requirements for a substitute declaration on behalf of the non-signing inventor John Barry Finn have been satisfied, and urges that the application is now in condition for passing to examination on the merits.

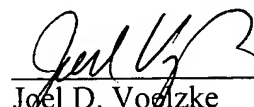

No petition fee is seen as necessary in connection with the paper, because the petition fee was previously paid.

Respectfully submitted,

2. Outstanding Formalities

To complete filing requirements there is a need to submit some formal documentation, copies of which are attached.

The first is an Appointment of Agent to be dated and signed by the inventors and also by an authorised officer of the company. This form is due to be filed by **18 December 2003**. This form, once completed, simply authorises BSW to act on behalf of the parties named in the application.

Secondly, there are two documents relating to the application in so far as it relates to the US. This includes a Declaration of Inventorship to be dated and signed by the inventors. This form is due to be filed by 8 March 2004. The other is an assignment that is to be dated and signed by the inventors before two witnesses, on the same day as the Declaration of Inventorship is signed.

The Declaration of Inventorship is to be included in the PCT Request and is for the purposes of the designation of USA only. The International Bureau will transmit a copy of the Declaration to the US Patent Office. Subsequently, it is only where the US Patent Office may reasonably doubt the veracity of the declaration that further documents will be required. Accordingly, we recommend lodging the Declaration now in the international phase since this may dispense with the need for filing further declarations at the US national phase stage.

3. Publication of the Application

Details of the application will be published 18 months from the priority date which, in this case, is about May 2004. Once the official notice of that publication issues, we shall let you know.

4. International Search Report

We expect to receive an International Search Report (ISR) relating to the application within the next month or so. We will forward this to you on receipt and advise you of the further steps to be taken at that stage.

5. Concluding Comments

Please do not hesitate to contact us if further information is required in the interim.

Yours sincerely
